

Join us at the Branson™ Automation Workshop

Nove Mesto, Slovakia, on 9-13th March 2026

The Branson Automation Welding workshop is tailored for machine builders and system integrators seeking to enhance their knowledge of plastic joining technologies, such as Laser, Ultrasonics, and PulseStaking, and to explore related areas with instruction on Afag handling systems. This workshop offers a blend of theoretical concepts and hands-on practical training using Branson products and applications, creating a remarkable training experience. It's a two day course, running over 5 days in March.

Topics Covered Include

- An overview of joining technologies for welding, un-welding, and de-gating covering the technology, products and communication capability.
- Practical, hands-on training combined with theoretical instruction for applications.
- Machine feeding solutions from Afag™.
- Sharing of Best practices in design.
